

Sunny's Spring Dale School students visit NEERI

■ District Correspondent

BHANDARA, Sept 19

UNDER the auspices of Vidnyan Bharati, students of Class 9 from Sunny's Spring Dale School, Bhandara, visited the CSIR-National Environmental Engineering Research Institute (NEERI), Nagpur, for an educational visit, recently.

The objective of the visit was to provide students with practical exposure to environmental science, pollution control and modern scientific technologies. During the visit, the students were introduced to the work and activities of NEERI through an audio-visual presentation. They also visited the Green Museum, where they learned about various aspects of the environment. The students were further guided on environmental education and awareness.

On this occasion, Scientist Ritesh Vijay explained to the students how contaminated water can be purified, the major

Sunny's Spring Dale School students at NEERI, Nagpur.

causes of water pollution and various scientific methods used for water purification. The students enthusiastically asked questions and gained a better understanding of the water purification process.

The students also visited the Air Quality Management Division, Environmental Material and Sustainable Systems Division and Solid & Hazardous Waste Management Division, where they learned

about air pollution control, environmentally friendly materials, sustainable technologies and solid and hazardous waste management. Samruddhi Gangakhedkar and Geeta Motghare represented Sunny Spring Dale School during the visit, while Dr Ramesh Taikar represented Vidnyan Bharati.

The educational visit was successfully completed with the valuable support and cooperation of Sudhir Joshi, Member

of the Vidnyan Bharati, Prakash Kumbhare (Scientist, NEERI) and Ashish Jain.

The visit provided students with valuable practical exposure to scientific research, environmental management and pollution control. It proved to be a knowledge-enhancing and inspiring experience for the students and helped develop scientific temper, environmental awareness and curiosity towards scientific research.
