

CSIR-NEERI Director elected Fellow of Indian National Science Academy

Dr. S. Venkata Mohan, Director, CSIR-NEERI has been elected as a Fellow of the Indian National Science Academy (INSA), one of the country's premier scientific academies.

His pioneering research in sustainability-driven bioengineering, circular bioeconomy, biorefineries, low-carbon energy and waste-to-wealth technologies has led to impactful innovations in wastewater treatment and CO₂ bio-sequestration.

With 450+ research publications, 16 patents and 47 Ph.D. scholars supervised, Dr. Mohan's globally recognised work continues to advance sustainable environmental research and strengthen India's leadership in environmental biotechnology.

*Heartiest
congratulations*
to

Dr. S. Venkata Mohan

on this distinguished recognition!

NEERI director elected fellow of Indian Science Academy

LOKMAT NEWS NETWORK
NAGPUR

Dr S Venkata Mohan, Director, CSIR-National Environmental Engineering Research Institute (CSIR-NEERI),

Dr S Venkata Mohan

has been elected as a Fellow of the Indian National Science Academy (INSA), one of the country's premier scientific academies.

Dr. Mohan's research addresses critical environmental challenges through sustainability-driven bioengineering and circular bioeconomy approaches. His pioneering work on biorefineries, low-carbon energy and waste-to-wealth technologies has contributed to scalable innovations in wastewater treatment and CO₂ bio-sequestration. Dr Mohan has also received several prestigious honours.

Neeri dir Mohan elected Indian National Science Academy fellow

Nagpur: S Venkata Mohan, director, CSIR-National Environmental Engineering Research Institute (CSIR-Neeri),

has been elected as a Fellow of the Indian National Science Academy (INSA).

Mohan's research addresses

critical environmental challenges through sustainability-driven bioengineering and circular bioeconomy approaches. His work on biorefineries, low-carbon energy and waste-to-wealth technologies has contributed to innovations in wastewater treatment & CO₂ bio-sequestration. TNN
