

Ms. Upasana Mahato, AcSIR PhD student working under the guidance of Dr. Rakesh Kadaverugu, Principal Scientist, CSIR-NEERI, has been awarded Best Poster Presentation for her research on “Accuracy assessment of CMIP6 models for projected changes in temperature & precipitation over Indian agro-climatic zones.” The work was presented at the International Symposium on Tropical Meteorology (INTROMET 2025) at IITM Pune, held during 18–20 November 2025.

Her award-winning research provides valuable insights for improving climate projections and regional climate adaptation strategies for the agriculture sector. The recognition brings pride to CSIR-NEERI and highlights the impactful contributions of young researchers in climate science.
