

## **Induction and orientation programme for student-trainees of CSIR-NEERI**

CSIR-National Environmental Engineering Research Institute (CSIR-NEERI) organised an 'Induction and Orientation Programme' for student-trainees of CSIR-NEERI on June 20, 2017 in NEERI Auditorium. This programme was aimed to develop leadership qualities, innovative and functional skills, and team spirit. The student-trainees were introduced to CSIR-NEERI scientists and familiarised with the functions and processes of various departments and their interrelationship. While introducing themselves, the student-trainees told about methodological and subject knowledge of their respective areas relating to environmental monitoring, industrial wastewater treatment, sewage treatment, health impacts due to air pollution, etc. The student-trainees were given an opportunity to establish more contacts with CSIR-NEERI scientists. Dr. Pradeep Salve organised the programme under leadership of Dr. J.S. Pandey, Science Secretary, CSIR-NEERI. Members of Skill Development Group were also present on this occasion. The student-trainees who completed their project work will be awarded certificates.
