

Director's message for Swachhata Pakwada :

Everyone wishes for a clean India but not everyone wishes to do their bit in keeping India clean. Nagpur alone generates 1200-1300 tonnes of solid waste per day. It is impossible to manage this without segregation. I urge every citizen to take responsibility, own up to bad practices, follow and spread awareness. Until everyone does not develop a sense of belonging, "My City" My Country", the dream of a clean India cannot be achieved. The distance between dreams and reality is called ACTION. Please join us at NEERI and help keep our cities clean.
